ALTIMAX 365AW

FEATURES + BENEFITS

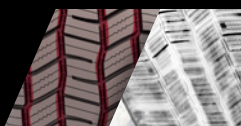

1 SINUSOIDAL SIPING SYSTEM:
High density of lateral snow edges which generate snow grip for improved snow braking and handling. Interlocking of siped blocks enhances dry handling.

2 TRACTION TEETH:
Bite into snow and slush to create additional traction in deep snow and slush conditions. Deflects stones to prevent tread from catching gravel and protects from tread penetration.

3 WAVED LONGITUDINAL GROOVES:
Wide longitudinal grooves for good hydroplaning performance and interlocking snow-blocks for snow traction.

4 CENTER RIB WITH LESS SIPES:
Increases lateral pattern stiffness for dry handling and even wear.

5 LATERAL GROOVES CONNECTING WITH LONGITUDINAL GROOVES:
Efficiently drain water for wet performance.

6 VISUAL ALIGNMENT INDICATORS (VAI®):
Gives drivers visual feedback about correct steering adjustment of vehicle

7 SILICA TREAD COMPOUND:
Improves wet grip.

3-PEAK MOUNTAIN SNOWFLAKE CERTIFICATION:
Certified for use in severe winter conditions.
